

MICRO-POLYVIALS® 1.5 ML

PACKAGING VIALS FOR SMALL VOLUMES

Micro-Polyvials® have been developed for storage and packaging low volumes of reagents. They are made of high purity, virgin polypropylene. The well proven design of the closure ensures tight sealing without the use of septa or liners. With their slight conical shaped bottoms, the Micro-Polyvials® are ideal

for high recovery. The Micro-Polyvials® are easy to open and close due to their large shoulders and the ergonomic structure of their caps. Micro-Polyvials® are available with white and colored caps for easy identification.
